REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant invention claims a process for producing a glass substrate for a magnetic recording medium and a glass substrate produce by such a method. The method includes imparting a processing mark having a permanent strain to the main surface and chemically etching the glass plate. The processing mark is formed by rubbing the glass plate in a circumferential direction. Specific properties of such formed glass substrate are also claimed.

The closest prior art references that relate to the claimed invention are Sakai'139, Miyamoto'634, Sakai'404 and JP-A-63-160010. The closest prior art references disclose that it is known in the art to process a glass substrate for magnetic recording media and use specific steps such as etching or rubbing the surface of the substrate. However, the prior art does not teach or suggest the instant invention wherein the specific method steps and properties of the glass substrate are claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
